

Serial No. 09/370,388

including a catch engaging one of said recesses to secure said male and female parts together, said prongs being adapted to flex under finger pressure to disengage said catches from said recesses to release said male and female parts; and a cantilevered tongue located between said prongs;

FI.                      said cantilevered tongue further including a member normally engaging said prongs when said prongs are positioned to secure the male and female parts together to prevent said prongs from releasing said male and female parts; and

                        a button integrally formed with said cantilevered tongue and normally positioned in said aperture for disengaging said prong engaging member from said prongs.
